

**Appendix 1-NCPR Product Conformity Table Sample-0471 Thermal insulation and pliable membranes**

This guide is applicable to insulation and pliable membranes for floors, walls, ceilings and roofs. It generally relies on AS/NZS 4200.1, AS 4200.2 and AS/NZS 4859.1. A pliable building membrane may be installed to act as a sarking membrane, vapour barrier, thermal insulation or any combination of the three. This worksection does not cover insulation for services (e.g. for ductwork) or acoustic insulation.

Product Type	Pliable building membrane (elastomers, plastics and composite products)	Rigid and flexible thermal insulation materials (batt and blanket thermal insulation)	Thermal insulation materials (batt and blanket thermal insulation)	Insulation materials, Materials with reflective facing	Pliable membranes	Polyurethane (rigid cellular RC/PUR)	Polyisocyanurate (rigid cellular RC/PIR)
Conformity Requirement	AS/NZS 4200.1: 2017- Pliable building membranes and underlays- Materials	AS/NZS 4859.1 :2018- Thermal insulation materials for buildings — General criteria and technical provisions	AS/NZS 4859.2:2018 -Thermal insulation of buildings Design	AS/NZS 1530.3:1999 -Methods for fire tests on building materials, components and structures- Simultaneous determination of ignitability, flame propagation, heat release and smoke release	AS 1530.2:1993- Methods for fire tests on building materials, components and structures- Test for flammability of materials	AS 1366.1:1992- Rigid cellular plastics sheets for thermal insulation-Rigid cellular polyurethane (RC/PUR)	AS 1366.2:1992- Rigid cellular plastics sheets for thermal insulation-Rigid cellular polyisocyanurate (RC/PIR)
